Motion Express Program

Cloud Zero

A new way to relax

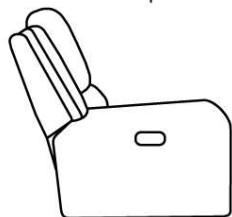

Features Extended Footrest

Stanton is excited to introduce our new Cloud Zero reclining mechanism. Currently featured on the 823 and 888 frames, with many more frames to be announced soon, Stanton Cloud Zero items are a brand new level of comfort designed to alleviate the everyday aches and pains. By positioning the user in a neutral position with the legs and heart in line with each other, Cloud Zero gives an almost weightless feel while lending to many benefits on the body including but not limited to the following :

Reduce Back Pressure

By shifting the body into a neutral posture, you are reducing the forces of gravity acting upon your spine and vertebrae, helping to reduce pressure.

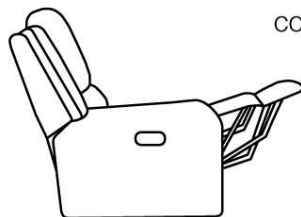

Closed

Reduce Swelling

Raising the legs into a neutral position can help those suffering from swelling and inflammation in the lower body allowing for the lower body to rest more comfortably.

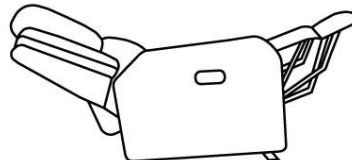

Legs Elevated

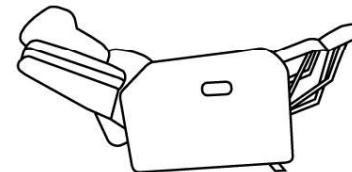

Tension Relief

By choosing a neutral position the strain and tension in the neck and shoulders muscles are able to relax more effectively, reducing stress and leading to better rest.

Cloud Zero Recline

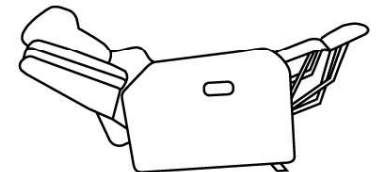

Cloud Zero Recline
w/ Headrest

Encourage Increased Circulation

As the body shifts into neutral posture, the heart is no longer forced to work against gravity to pump blood up from the legs, which can encourage improved blood flow.
